

VGST Project on Road Making by Using Plastic Waste

Recently, our college students Mr. Calvin Christopher and Miss Anita Jose, B.Sc. V Semester, have completed a project on ***Road Making by using the Plastic Wastes***. This has been completed under the project sanctioned by **Vision Group of Science and Technology**.

As explained by students and Project Guide Smt. Sudha.S. Patil, 5% plastic waste by weight of bitumen was found to be stable than 8% of plastic. Two patches of road are laid in the college campus which is about 9 feet width and 3 feet length. According to the references, it is known that plastic increases the luster and life of road.

Dr.(Smt) Hanagandi, HOD, Zoology, encourages the students to take such ***eco- friendly projects***. Principal Shri. V.B. Hiremath is the guiding force for such useful projects.
